PROJECTS

1. OFFER UP - OLD MOTORBIKE SELLING WEBSITE

[Live Site](#) [Github Client Site](#) [Github Server Site](#)

Website Feature

- By creating an account user can pay his booking bike instantly. In addition, user can add or deleted his /her posted advertisement.
- In this website Buyer, admin and seller will see their different dashboard depending of user info. Also, can verify seller
- I have used React date Picker, react feedback, react hook form, react toastify, date fns, react axios to load data from mongo DB. Also, used react tanstack query to load data.

2. HEALTH COACH - TRAINING WEBSITE

[Live Site](#) [Github Client Site](#) [Github Server Site](#)

Website Feature

- Client can get training by enrolling any training and train at his own pace. Also, can give review about the course.
- I have implemented google sign-in and Github sign in Feature here.
- I have used Tailwind css, daisyUI , React-router-dom, react-helment, Firebase and JWT Token.

3. QUIZ4U - AN QUIZ WEBSITE

[Live Site](#) [Github Link](#)

Website Feature

- Anyone can participate in the quiz. Wrong answer will give you a toast for wrong answer and for correct answer as well.
- Also, can see the statistics of quiz questions. It's a simple website with internal database.
- I have used react router dom, Tailwind CSS, Daisy UI, Rechart, HeroIcons and toastify.
